

Advising Tip 07
Advising Information
A Gracious Reminder from the Department of Biology & Marine Science

In Biology and Marine Science we offer BIOL 100 which students can use to fulfill their lab course requirement for the University Core. We have noticed that some students are waiting until their Senior year to take this course. When students do not pass the course this can result in a delay in graduation. Therefore, we would like to ask that advisors continue to remind their students that it is recommended that they take their core lab course requirement prior to their Senior year.
