The policies stated in this handbook are consistent with University policies but are set forth in terms that are more specific so the resident or fellow enrolled in the orthodontic residency will have a concise statement of expectations. These policies are reviewed, revised, and adopted by the School of Orthodontics Faculty Committee.
ORTHODONTIC DEPARTMENT FACULTY AND STAFF

ADMINISTRATION

Interim Dean, BRCHS
Cheryl L. Bergman, PhD, ARNP, CEN

Program & Clinic Director
James Trouten, DDS, MSD, Cert Ortho

Department Chair
Oscar Olavarria, DDS, CAGS

Director of Fellowship Program
Eman Othman, DDS, MS

FULL-TIME FACULTY
Isil Aras, DDS, PhD
Jorge Farill, DDS, Dip Ortho
Richard Griffith, DDS, MSD
Oscar Olavarria, DDS, CAGS
Sawsan Tabbaa, DDS, MS, ABO
James Trouten, DDS, MS, ABO
Grant C. Vezina, DDS, MSD

PART-TIME FACULTY
Gabi El-Bahri, DDS
William Swigler, DDS

RESEARCH AND INTERDISCIPLINARY RESOURCE
Peter Buschang, DDS, PhD
Tirbod Fattahi, DDS, MD
David Kerns, DMD

ADMINISTRATIVE STAFF

Business Operations Manager

Overview
The Jacksonville University Brooks Rehabilitation College of Healthcare Sciences, School of Orthodontics (JUSO) mission, philosophy and program outcomes are congruent with those of Jacksonville University and consistent with the Council on Dental Accreditation standards of the American Dental Association and the guidelines for the preparation of orthodontic professionals.

Mission of the School of Orthodontics
The JUSO values the diverse backgrounds and experiences of its residents/fellows and emphasizes the importance of professional ethics, scholarly inquiry, engaged learning opportunities and clinical competence in the practice of orthodontics.

The mission of the JUSO is the success of each resident/fellow as a self-assured, proficient orthodontist, who can practice in dynamic health care environments, provide leadership to promote and improve oral health, is committed to the advancement of orthodontic knowledge and practice, and aspires to lifelong learning and achievement in advanced studies.

Philosophy of the School of Orthodontics
The philosophy of the JUSO is derived from the faculty’s beliefs regarding person, environment, health and wellness, professional practice, graduate orthodontic education, and teaching-learning. The philosophy reflects the mission statements of Jacksonville University and the School of Orthodontics.

People are unique in their capacity for self-awareness, rational thinking, creativity, response to patient’s chief concerns, and deliberate action to resolve these problems and meet valued goals. Each person evolves from a diverse background and has innate and acquired internal resources to meet multidimensional needs. People interact continuously with the environment and are the essence of a dynamic global community.

Environment is any facet of the community and culture external to the person. The interaction between the person and environment may affect the person’s health, illness and access to services. Delivery of orthodontic care will be responsive to the person and environment. People become clients of orthodontists when they actively seek an improvement in their dentofacial appearance and/or oral function.

Orthodontic health is the expression of physical, psychological, spiritual, and social well-being manifested and determined by the adaptive abilities of persons. Perceptions and levels of health vary among people throughout the life span. Health is affected by personal initiative and interaction between health care providers and persons as they access complex, dynamic health care systems. Orthodontics has a major role in being culturally sensitive to the needs of increasingly diverse populations and in helping people access oral health care services.

Orthodontics is an art and science, which facilitates health promotion in individuals, families and communities. Critical thinking and the application of theory and research are inherent in the orthodontist’s role and provide the basis for judicious decision-making, problem solving and health
planning. Orthodontists embrace values, behaviors, and recognized standards that are the foundation for ethical and legal practice.

Orthodontists use critical thinking and problem solving to assess, design, manage and evaluate care in collaboration with clients and other health professionals. The orthodontist is accountable for the delivery of competent, cost-effective care that will result in expected outcomes.

The faculty believes that graduate orthodontic education is the basic entry level into professional practice. Graduate orthodontic study prepares dentists as self-assured, competent practitioners who think critically, communicate effectively, and assess and manage the oral health care needs of clients. The curricular progression fosters professional socialization for future roles and responsibilities within the global oral health community. As residents/fellows learn and mature in orthodontic knowledge and ability, they enter practice as competent orthodontists adept in the use of information and health care technology, provide leadership to promote and improve health, and aspire to life-long learning and achievement.

Learning is viewed as a life-long process facilitated by creative thinking and creative inquiry. Faculty view teaching as a process that actively engages the resident/fellow. Clearly defined learning objectives are accomplished through expert blending of a variety of interactive, clinical methods and traditional classroom approaches. Residents/fellows are responsible for their own learning and achievement of outcomes. Faculties serve as role models and mentors and are responsible for creating an environment conducive for learning. A supportive environment is fostered through close interaction among residents, fellows, faculty, and staff. Residents/fellows and faculty share responsibility in contributing to the development and support of persons associated with the JUSO community.

Program Outcomes
Upon completion of the Program, the graduate will be able to:

Biomedical Sciences
- Develop treatment plans and diagnoses based on information about normal and abnormal growth and development;
- Use the concepts gained in embryology and genetics in planning treatment;
- Include knowledge of anatomy and histology in planning and carrying out treatment; and
- Apply knowledge about the diagnosis, prevention and treatment of pathology of oral tissues.

Clinical Sciences
- Deliver evidence-based orthodontic treatment; (EBD is an approach to oral health care that requires the judicious integration of systematic assessments of clinically relevant scientific evidence, relating to the patient’s oral and medical condition and history, with the dentist’s clinical expertise and the patient’s treatment needs and preferences.)
- Gain extensive and comprehensive clinical experience, which must be representative of the character of orthodontic problems encountered in private practice;
- Coordinate and document detailed interdisciplinary treatment plans which may include care from other providers, such as restorative dentists and oral and maxillofacial surgeons or other dental specialists
- Treat and manage developing dentofacial problems which can be minimized by appropriate timely intervention;
- Use dentofacial orthopedics in the treatment of patients when appropriate;
- Treat and manage major dentofacial abnormalities and coordinate care with oral and maxillofacial surgeons and other healthcare providers;
• Provide all phases of orthodontic treatment including initiation, completion and retention;
• Treat patients with at least one contemporary orthodontic technique;
• Manage patients with functional occlusal and temporomandibular disorders;
• Treat or manage the orthodontic aspects of patients with moderate and advanced periodontal problems;
• Develop and document treatment plans using sound principles of appliance design and biomechanics;
• Obtain and create long term files of quality images of patients using techniques of photography, radiology and cephalometrics, including computer techniques when appropriate;
• Use dental materials knowledgeably in the fabrication and placement of fixed and removable appliances;
• Develop and maintain a system of long-term treatment records as a foundation for understanding and planning treatment and retention procedures;
• Practice orthodontics in full compliance with accepted Standards of ethical behavior;
• Manage and motivate patients to participate fully with orthodontic treatment procedures: and study and critically evaluate the literature and other information pertaining to this field.

Research
• All the residents/fellows will participate in research endeavors through the initiation and completion of a research project*. Instructions for developing a research proposal and writing a research manuscript will be provided in the program coursework. Check the current academic catalogue for the most recent course descriptions. At the conclusion of the series of research courses, the student will be expected to provide:
  o Final presentation of their research project.
  o Analysis of the collected data.
  o Interpretation and conclusion of the project.
  o Final write-up of the research capstone project approved by the student’s advisory committee.
  o Submission of a manuscript of the research project to a recommended peer-reviewed journal.
Application for Admission

Admission is open to qualified people of any race, color, religion, and national or ethnic origin. The JUSO has its own admission process that is distinct and separate from that of the rest of the University. It is a highly selective process. Approximately three-hundred (300) applications are received for fifteen (15) available seats.

Fifteen (15) new residents are selected each year to be enrolled in the combined orthodontic certificate (CAGS) and the Master of Science in Dentistry (MSD) program. Five (5) new residents are selected for the one-year Fellowship Program. JUSO requires all applications to go through PASS, however, we DO NOT participate in MATCH. The PASS application is found at www.adea.org. Applicants are to follow the directions on the PASS website.

JU also requires completion of its own supplemental application available on the website: https://www.ju.edu/orthodontics/prospective-students/admissions.php. The following documents must accompany the fully completed supplemental application:

- $175.00 non-refundable application fee paid online
- 2X2 recent passport photo
- TOEFL scores (if applicable) or IELTS
- Curriculum Vitae

As this is a self-directed application, it is the applicant's sole responsibility to ensure the application is completed and received on a timely basis.

JU Minimum Requirements for U.S. Students

- DDS/DMD or equivalent
- US National Board Scores Part I and Part II (if applicable)
- Letters of Recommendation (3) from:
  - Dean of the Dental School, or
  - Dental School Faculty, or
  - Professional Colleagues all of whom can attest to the character and background of the applicant
- Autobiographical sketch stating goals and purpose
- Recent 2X2 passport style photo
- $175.00 non-refundable application fee paid online

JU Minimum Requirements for International Students

- International dental graduate students must possess a U.S. or Canadian Dental Degree or the educational equivalent as determined by the Program Director of the School of Orthodontics.
- US National Board Scores Part I and II (if available)
- TOEFL scores above the 90th percentile (270 computer, 610 paper)
- Letters of recommendation (3) from
  - Dean of your Dental School, or
  - Dental School Faculty, or
  - other Professional Colleagues; all of whom can attest to the character and background of the applicant
- Autobiographical sketch stating goals and purpose
- Recent 2X2 passport style photo
• $175.00 non-refundable application fee paid online
• Current US Visa (in case of interview)

Applications for admission are accepted through a date determined each year in early to mid-September. Applications will only be considered if all admission materials have been filed on time with the JUSO according to the calendar posted on the website. All applicants will be evaluated on the strength of their academic and professional record.

Selection Process
Admission is highly selective and limited to those applicants who demonstrate potential for successfully completing the program. The decision is based on evaluation of the applicant’s dental school portfolio, research experience, work experience (if applicable), letters of recommendation, and the personal interview, including the written essay. Candidates with a cumulative dental school G.P.A. below 3.5 are recommended to apply to the one year Fellowship in Orthodontic Clinical Research. There is no guarantee of admission to Residency in Orthodontics, but the Faculty will have the opportunity to better assess the Fellow’s potential.

Required Documentation
• Basic Life Support/CPR
  All residents must have an up to date BLS/CPR card. JUSO offers card renewal classes at various times of the year. A copy of your current card (front and back) must be on file with the Academic Coordinator prior to the start of the program.
• Dental Resident Permits
  The Academic Coordinator will file the necessary paperwork for the Florida Dental Residency Permit. You must answer the questions on the permit form and sign the application. In order for the permit to be issued, the resident/fellow must supply the two-sided copy of the current BLS/CPR form, official graduate transcripts and a social security number.
• Health and Immunizations
  As you are entering a healthcare or educational profession, there are certain public health requirements that must be adhered to. The following immunizations must be up-to-date when you enter our program. Health screening is required and immunization records, including results from TB testing must be on file, prior to the start of the residency.
  • Tuberculin skin test within the past 12 months or documentation as a previous positive reactor; and
  • Proof of Rubella and Rubeola immunity by positive antibody titers or 2 doses of MMR; and
  • Varicella immunity, by positive history of chickenpox or proof of Varicella immunization; and
  • Proof of Hepatitis B immunization or declination of vaccine, if patient contact is anticipated; and
  • Tetanus shot within the last 5 years; and
  • Flu shot during each active flu season. If you are unable to take the flu shot, you must have documentation of this from your physician.
  People not correctly immunized pose a significant public health risk to their patients, co-workers and themselves. TB tests must be renewed each year. It is your responsibility to update your TB test and any immunizations that have expired during your time at the University.
• **Match**
  Notice must be on file reflecting the resident’s withdrawal from MATCH.

• **Local Phone Number:**
  In order for patients to be able to reach you, it is required that you have a local (904) area code phone number. If you do not want to change your current cell number, you can opt for a GOOGLE VOICE number (which is a free forwarding service to your cell or home (http://www.google.com/support/voice).

• **Student Health Insurance**
  All full-time Traditional Undergraduate students enrolled for a minimum of twelve (12) credit hours will automatically be enrolled in the Jacksonville University Student Medical Insurance Plan and the premium for coverage is added to the tuition billing upon registration. **This plan is also added automatically for Orthodontics students, excluding those participating in the Clinical Research in Orthodontic Fellowship Program.** Coverage can be waived if evidence of other comparable coverage is presented prior to the waiver deadline. Once the 2018-2019 information is available, it will be posted at [https://www.ju.edu/controller/student-health-insurance.php](https://www.ju.edu/controller/student-health-insurance.php)

• **Transcripts**
  Official transcripts are required to be on file before you enter the program. The resident will need to contact their school to have the transcripts directly to the Academic Coordinator by mail to: School of Orthodontics, Jacksonville University, 2800 University Blvd N., Jacksonville, FL 32211 or by secured email to juorthoadmissions@ju.edu. Official transcript translations (ECE or WES) for all international transcripts are to be handled the same way. Transcripts loaded into your PASS application are not considered official. If your institution offers E-Transcripts have them sent to juorthoadmissions@ju.edu

The availability of specific E-Transcript delivery options depends on the individual institution. This means that some institutions may offer one or more options for delivering your transcript electronically and other institutions may not offer any electronic options. If your institution offers E-Transcripts have them sent to juorthoadmissions@ju.edu
**Academic Standards**
Residents/Fellows must maintain an academic grade point average (GPA) of at least 3.0 (B) during their enrollment in the program. In order to graduate, residents must have at least a 3.0 (B) GPA. Each course taught in the program will provide residents with a syllabus that explains the grading system for that course. The type of remediation needed to lift a grade of C to passing will also be explained in the course syllabus.

**Academic Standing**
Orthodontic residents/fellows will be placed on academic probation if their cumulative GPA drops below 3.0 (B). Those who do not achieve a cumulative GPA of 3.0 (B) within two semesters of being placed on academic probation will be dismissed from the program. A resident/fellow who receives one “C” or below will be placed on academic probation. A subsequent grade of ‘C’ or below will dismiss them from the program regardless of GPA. Any resident who receives an “F”, designating a grade that has no potential for remediation, will be dismissed from the program. Residents dismissed from the Orthodontic program may appeal the action to the JUSO Disciplinary Committee.

**Program Completion**
In order to receive their diploma, residents at a minimum must:
- Receive a grade of B or higher in all didactic courses
- Complete all patient care related administrative duties
- Turn in a hard and electronic copy of their successfully defended research thesis

**Grading**
Grades given in the School of Orthodontics are based on acquired points rather than percentages. The grade equivalent is discussed in the syllabus for each course.

<table>
<thead>
<tr>
<th>Grading Scale:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90-100</td>
</tr>
<tr>
<td>B</td>
<td>80-89</td>
</tr>
<tr>
<td>C</td>
<td>70-79</td>
</tr>
</tbody>
</table>

In courses designated to prepare residents for the American Board of Orthodontics (ABO) written exam a minimum test average of 80% must be achieved.

An “I” indicates that a resident/fellow did not complete a course for a reason acceptable to the professor and requested and received permission from the Program Director to complete the course within the first four weeks of the next semester. The resident/fellow must be passing and have completed all but a particular segment of a course to qualify for a grade of “I”. The “I” will be converted to the appropriate letter grade if the course work is completed by the end of the fourth week of the next semester. If the “I” course work is not completed on time, the “I” will convert to an “F”. The “I” converted to grades “A” through “F” will then be used in computing the GPA and may result in a change of academic status if the resulting GPA so indicates. An orthodontic resident cannot register for the second year while an “I” grade remains on the resident’s record without permission of the Program Director.

In the event that a student feels he/she has been treated unfairly, or that an instructor has deviated from his/her prescribed formula for grading in an arbitrary or unwarrantedly punitive manner, the student may appeal the grade. See Appendix Q for Jacksonville University’s Standard Procedure for Appeals of Grades and Sanctions.
**Class Attendance**
Faculty believe strongly that class attendance is necessary for residents and fellows to learn the assigned material and achieve course objectives. All residents/fellows are expected to attend and participate in scheduled classes according to published courses syllabi. **The same applies to all guests’ lectures, continuing education courses and lunch & learns scheduled by the school.**

Residents/Fellows are expected to attend class on time. Unavoidable and/or unexpected circumstances beyond the resident’s ability to control or anticipate may be considered acceptable reasons for tardiness. A pattern of tardiness will result first in a verbal/written warning and if continued will result in a Disciplinary Committee proceeding. Unless permission to leave class early is granted by the professor, residents/fellows are expected to remain in class until the class is completed.

**Attendance Protocol**
Attendance is taken by the faculty member on a regular basis for all classes. The list is kept in the office of the school’s Clinical Director. It is the resident’s/fellow’s responsibility to justify absence or excessive tardiness. The course director will determine academic consequences accordingly.

Clinical attendance will be tracked through reports from Faculty and scheduling in Oasys. Irregular scheduling patterns and phantom patients will be monitored by the administrative staff and reported to the Clinic Director.

Frequent absences will be discussed with the resident/fellow by the course director (and Program Director when Faculty member so chooses). Frequent unexcused absences are referred to the disciplinary committee for appropriate recommendation to the Program Director.

**Request for Absence**
A Request for Time Off is to be submitted in a timely manner to the Program Director with appropriate signatures. (See Appendix C). Current guidelines for personal, scientific conferences and study days are to be followed at all times.

Residents/Fellows are expected to be present at the school at all times unless otherwise allowed. Proper coverage is to be designated by the absent doctor beforehand whenever possible. The designated Front Desk representative is to be informed every time the doctor is expected to be away from the clinic.

Unanticipated absence or illness are handled as an exception:
- The resident/fellow notifies the faculty member in charge of the seminar/class to be missed by (phone or text)
- The resident/fellow notifies the front desk representative to reschedule their patients accordingly (phone)
- The resident/fellow notifies the Clinical Director by email.
- A request for absence form must be submitted upon the resident/fellow’s return.

Whenever possible, provide coverage for presentations. Class representatives will coordinate the schedule accordingly. If last minute coverage is impossible, the resident/fellow will present first upon their return and schedule will be adjusted to accommodate this.
**Vacation/Holiday/Personal Time Off**

Each resident in the program can request up to *six* personal days during each of the two years of the program beyond which a remedial course work will be required from the resident at the discretion of the Program Director/Program Director. A resident may be absent from the school during this time for illness (self or dependent), religious observances, preapproved scientific meetings, participation in university activities at the request of university authorities and compelling circumstances beyond the resident’s control. Remediation in clinical coursework may include performing clinical tasks beyond the duration of the residency if the clinical schedule so dictates. Providing coverage for assigned tasks such as emergency rotation must be insured by the resident prior to requesting time-off. Second year residents should not request all of their time off at the end of the residency.

Residents/Fellows must submit the personal day request in writing at least six weeks in advance and supply appropriate documentation, e.g., medical documentation. Course syllabi should specify the nature of the in-class participation expected and the effects of absences on grades. Residents/Fellows with written excused absences are entitled to a makeup exam at a time mutually convenient for the instructor and resident/fellow. This includes that residents/fellows are responsible for submitting notification of the projected absence(s) six weeks in advance to the Course/s Director/s as well as Clinic Director. This is especially important for final examinations. Instructors should take the validity of these requests at face value. Not all requests will be automatically approved depending on academic standing and impact on patient care.

The school conforms to the academic calendar of the University regarding scheduled vacations. The Holidays currently recognized by the University are:

- Labor Day
- Veterans Day
- Thanksgiving Break
- Winter Holiday Break
- Martin Luther King Day
- Spring Break
- Memorial Day
- Independence Day

The specific dates are issued by the Office of the President at the beginning of each new academic year.

Residents will be granted up to *five* days total to study for both the American Board of Orthodontics written examination and an international Board exam during the second year. Residents taking regional board of dentistry examinations will be given *one day* of travel time to the exam in addition to the actual time to take the exam.

**Academic Conference Policy**

The Jacksonville University School of Orthodontics will allow residents to attend two (2) conferences per academic year (July 1 to June 30):

- **First Year**: Graduate Orthodontic Residents Program (GORP) and the American Association of Orthodontists (AAO) Annual Session
- **Second Year**: the American Association of Orthodontists Annual Session and a second scientific meeting if the resident is presenting a paper, table clinic, or contribution to the program.

Approval to attend meetings not listed above require prior approval and may be eligible for reimbursement allowance. The Program Director will determine the amount of reimbursement allowance.
Reimbursement allowance cannot exceed $1,500 total for two (2) meetings per resident per academic year. Funds do not roll over from year to year.

**Maternity Leave Policy**
Jacksonville University School of Orthodontics residents/fellows may request to take up to 6 weeks of maternity leave. Independent of the duration of maternity leave, residents/fellows will be required to perform remediation in both didactic and clinical coursework which may include performing clinical remedial tasks beyond the duration of their residency if the clinical schedule so dictates. The Program Director with the aid of Faculty will design an individualized course of remediation.

**Disability Support Services**
If you seek assistance or request “reasonable accommodations” under the ADA Section 504 Act, you must provide complete medical and/or psychological documentation to the Director for Disability Support Services. Documentation must be current – not more than three years old. Requests for “reasonable accommodations” must be completed in a timely manner so faculty/staff can plan for the accommodations. Students with disabilities are responsible for maintaining the same academic levels as other students, maintaining appropriate behavior and providing timely notifications of special needs. Students must request “reasonable accommodations” each semester of enrollment to receive the accommodations. Contact Olga Lucia Flórez, M.Ed., M.P.A. Director of Disability Support Service at oflorez@ju.edu or by phone at 1 (904) 256-7787

Students with hearing and speech related disabilities should call the Florida Relay Service at 1 (800) 955-8771 for TTY assistance. The website is https://www.ftri.org/relay

A resident/fellow with a learning disability should weigh carefully with his/her advisor the requirements of the orthodontic program in order to ascertain its suitability, given the nature of the disability.

**Professional and Academic Conduct**
It is essential that all individuals associated with the Jacksonville University School of Orthodontics behave with integrity and in accord with the American Association of Orthodontists code of ethics (https://www.aaoinfo.org/news/2017/07/updated-principles-ethics-and-code-professional-conduct-available-members) Failure to guard confidentiality and/or to accurately report and record information may result in disciplinary action. Any violation of academic honesty must immediately be reported to the faculty.

For individual assignments, each resident/fellow is required to submit a complete paper that is unique to that resident/fellow and not a compilation of material created by two or more residents/fellows working together. Unless specified by instructor, it is permissible for residents/fellows to discuss with one another the requirements of an assignment and to explore possible ways in which to complete the assignment. When a resident/fellow uses an idea or concept created by another resident/fellow, it must be cited just as any other idea or concept is cited. For group projects, collaboration between class members is vital to the successful completion of the assignment. Sources used to fulfill requirements must be included in the bibliography or reference section of the assignment.

If there are any questions regarding professional and/or academic honesty, residents/fellows must seek clarification from faculty in a timely manner. Faculty is to provide guidelines that are precise and unambiguous. Residents/Fellows are to conduct themselves in a professional manner at all times. Any resident/fellow who is judged to be discourteous, rude, profane or hostile to faculty, staff or fellow residents/fellows will be reported immediately to the Program Director of the School of Orthodontics.
regarding continuation in the program and an appearance before the SOO Disciplinary Committee.

**Academic misconduct is defined as follows (JU Student Handbook):**

Any form of cheating, including concealed notes during exams, copying or allowing others to copy from an exam, students substituting for one another in exams, submission of another person’s work for evaluation, preparing work for another person’s submission, unauthorized collaboration on an assignment, submission of the same or substantially similar work for two courses without the permission of the professors. Plagiarism is a form of Academic Misconduct that involves taking words, ideas or any other material from a source, either verbatim or in paraphrase, without acknowledging the original author through proper citation(s). Cutting and pasting from any source including the Internet, as well as purchasing papers, are forms of plagiarism. (Warshauer, M., 2002.)*

Matthew Warshauer, History Department, Central Connecticut State University, Academic Misconduct/Plagiarism Questionnaire; http://www.history.ccsu.edu/

Such conduct may be subject to disciplinary action including:

- Penalizing a student’s grade on the assignment or examination in question
- Assigning a failing course grade
  - Dismissal from the University (in cases of especially egregious or repeated offenses).

The faculty regards all incidents of academic misconduct as major offenses that merit disciplinary action. Faculty members will handle each case of academic misconduct in accordance with their own course policy. In the spirit of academic freedom, no further action is required from the instructor following the action taken in response to the incident of academic misconduct if the student agrees to the penalty. However, it is strongly recommended that faculty members report all incidents of academic misconduct to the Provost, with notification to the division chair and appropriate college dean, in order to identify students who commit additional future incidents of academic misconduct. In addition, the instructor may recommend to the appropriate Division Chair, or College Dean if the department or academic unit in which the course is taught is not part of a division, further sanctions against the student deemed appropriate for the level of academic misconduct. These sanctions may include academic probation, suspension or expulsion. If the sanctions recommended by the instructor are not approved, the instructor may appeal the decision of the Chair/Dean to the Provost. If there is still disagreement, the instructor may refer the decision of the Provost back to the Chair/Dean of the Academic Unit from which the appeal originated. The Chair/Dean shall then form a five-person appeal committee along the same guidelines used for the formation of a committee to hear a student appeal.

**Honor Code**

Truth is a value essential to the profession of dentistry. To underscore the importance of truth, honesty, and accountability, residents, fellows, faculty, and staff in the School of Orthodontics adhere to the following honor code:

> I do not lie, cheat, or steal nor condone those who do.

Residents/Fellows must agree to the code of honor acknowledging that they understand this concept of honor. It is required that every resident/fellow practice academic and professional honesty.

**Disciplinary Policy Release**

Each resident/fellow accepted into the program agrees to:

- Represent the University in a manner that upholds the integrity and standards of the University
and the School of Orthodontics (professional meetings or events where the resident/fellow represents the Program);

- Notify the Program Director and/or a designated representative of any misconduct on the part of the resident/fellow;
- Understand the Program Director reserves the right to discipline the resident/fellow beyond actions taken by the Disciplinary Committee.

Examinations
During an examination, there will be no talking in the classroom, and all notebooks, textbooks, and papers will be closed and put away unless it is an open book examination. A resident/fellow may leave the testing room as soon as he/she has completed the examination and turned in testing materials to the person monitoring the examination. Faculty involved in testing have the prerogative of implementing additional security measures.

Residents/Fellows are expected to take exams on the day and time scheduled. If he/she must take an examination at a time other than the one established in the course syllabus, permission must be obtained from the professor prior to the date on which the exam is set. If he/she cannot take a scheduled examination because of illness or other valid reason, the appropriate instructor must be contacted prior to the examination. For unexpected or unforeseen events, when prior notice is impossible, the resident/fellow must contact the professor and explain the reason for missing the examination within the 24 hours following the scheduled exam time. If the reason for missing an examination is considered valid by instructor, he/she will be scheduled to take a makeup exam within five days of the original examination date or at a time convenient to the faculty.

If the instructor does not consider the reason given for missing the examination valid, the resident/fellow will not be permitted to take a makeup examination. If he/she fails to notify the professor prior to the examination when it is possible to do so, no makeup examination will be given. If a resident/fellow fails to notify the lead instructor within the twenty-four-hour period when an unforeseen event occurs, no makeup examination will be given. A zero will be given for any test that is missed and not made up.

Written Assignments
Each resident is expected to submit written assignments on the date specified in the class syllabus. Permission to turn in written assignments later than the scheduled time must be obtained from the Course Director prior to the due date. The Course Director has the right to refuse any written assignment submitted past the due date where the resident has not obtained prior permission to turn in the assignment late. The Course Director may elect to allow a paper to be turned in late for less than full credit.

All residents/fellows are encouraged to maintain a copy of every paper submitted for a grade.

Use of Resident/Fellow Created Materials
Written permission must be obtained before Faculty, administrators, or residents/fellows may use materials created by residents/fellows (written assignments, non-patient related PowerPoint material). Patient PowerPoints are considered part of the patient’s orthodontic record and may be used by faculty and residents/fellows in teaching and external peer-attended presentations while they are a resident or employed by Jacksonville University. Each resident/fellow will be asked to sign the “Consent to Use Student Work” at the beginning of the academic year, and has the right to refuse to do so (Appendix M). Signed forms are filed in individual resident file. If a resident/fellow exercises the right to refuse to sign
the form, faculty can request permission to use materials on an individual, project-by-project basis.

**PERFORMANCE APPRAISALS OF RESIDENTS, THE PROGRAM, AND FACULTY**

In compliance with the current CODA standards, class meetings between the residents/fellows and the program director are scheduled as need arises. Class representatives are elected by the residents each term in order to facilitate communication between administration and the residents/fellows.

Residents/Fellows are evaluated:
- Through individual courses’ grades
- By the Faculty at least once per year. The Student’s Evaluation Form is completed online.
- Through a Final Oral Exam in July of each year (See description below)

Faculty members are evaluated:
- By the residents/fellows using individual course evaluations administered by the institution (SRI)
- By the residents/fellows using individual evaluation forms once a year. The Faculty Evaluation completed online. Completion of this evaluation is mandatory.
- By the Program Director using Faculty Activity Assessment Report once a year.

Feedback about the institution is obtained when the second year residents undergo an exit survey to solicit input regarding all aspects of the program.

ALL RESPONSES REMAIN ANONYMOUS. THE DEAN, PROGRAM DIRECTOR, AND FACULTY DO NOT HAVE ACCESS TO INDIVIDUAL SURVEY RESPONSES. THE PROGRAM DIRECTOR RECEIVES A SUMMARY OF ALL RESPONSES WITHOUT ANY INDICATION OF INDIVIDUAL RESPONSES.
Clinical Policies

Any Clinical Faculty has complete authority to remove any resident whose behavior is unsafe or unsatisfactory from clinical care. The incident will be reviewed by the Program Director and Clinic Director. He/she will evaluate the nature of the incident and either apply the appropriate sanction on the resident/fellow or refer the incident for review by the School of Orthodontics Disciplinary Committee.

Treatment of Patients

In addition to our duly appointed faculty and appropriately trained support staff, only post-doctoral residents and or research fellows who are matriculated and are in good standing with the University, are permitted to treat patients in our facility. In order for ANY patient to be treated, they must be registered as patients of JUSO at the time treatment is rendered. Though patient care is most often rendered by our post graduate residents, the ultimate responsibility for a patient’s treatment rests with the supervising Faculty member and ultimately the Program Director. Patients may only be treated during regular clinic hours. Exceptions pertain to emergencies and must conform to the school policy addressing this issue as noted on the following two pages. All regular treatment must be supervised in accordance with the policy for obtaining faculty signatures noted elsewhere in this document. Only patients who have been accepted for treatment in our clinic or program may be treated. Without exceptions: NO private patients or non-registered patients may be treated in the JU clinic.

In cases of orthodontic emergencies, follow the policy for dealing with emergencies as outlined below. For patients having non-orthodontic dental emergencies, patients should be told to contact their dentist or local hospital emergency room.

Clinical Dress Code, Attire and Professional Appearance:

- A neat, clean professional appearance while engaged in patient care is required. Such a professional appearance communicates an image of quality work and respect for the patient’s well-being. Clothing must be clean, safe and in good repair. Discretion and modesty should prevail in the choice of clothing. Professional attire is especially enforced when speakers or other guests are present at the school.
- All residents/fellows will wear white clinic coats or disposable gowns, provided by the school, during patient treatment. Clinic coats/gowns are to be worn in all patient care areas, and must be fully buttoned (including the top snap or button) during patient treatment. A clean coat or gown is to be worn each day; it will be changed should it become visibly stained or contaminated during the clinic session. CLINIC COATS SHOULD NOT BE WORN OUTSIDE THE BUILDING OR INTO NON-CLINICAL AREAS OF THE BUILDING.
- Appropriate (Personal Protective Equipment) PPE is to be worn for procedures required by OSHA/WISHA/DOSH guidelines, which are stated in the SOO ‘Exposure Control Plan’. Once exposed to potentially infectious material, PPE is not to be worn outside the treatment area. White clinic coats are not considered appropriate if exposure to blood-borne pathogens is anticipated. PPE is required for all surgical procedures or where saliva splatter is expected.

Male Residents

Residents/Fellows must wear the appropriate color scrub shirt with slacks (no jeans or shorts), shoes, and socks. Shoes may be dress shoes, or clean, neat, athletic-type shoes. Clog shoes are acceptable if no perforations are present on the top of the shoe. All sandals or other types of open-toe shoes are prohibited. Plain white T-shirts may be worn under the scrub shirts. Short, white blazer jackets or lab coats that are clean and pressed may be worn over scrub shirts when in lab or class. Names are to be embroidered on all scrub shirts and lab coats. Hats/caps are not permitted.

Female Residents

Residents/Fellows must wear the appropriate color scrub shirt with slacks (no jeans, shorts or capri pants), shoes and socks or stockings. Skirts may be worn instead of slacks, as long as the skirts are an appropriate length for a professional school. Shoes may be flat dress shoes, but must cover the upper part of the foot; or clean, neat, athletic-type shoes. Clog shoes are acceptable if no perforations are present on the top of the shoe. All sandals or other types of open-toe shoes are prohibited. Plain white T-shirts may be worn under the scrub shirts. Short, white blazer jackets or lab coats that are clean and pressed may be worn over scrub shirts when in lab or class.
• If scrub attire is not worn in the clinic setting, men and women will wear attire appropriate for a professional environment. Men should wear clean, neat slacks and a collared dress shirt. T-shirts are not permitted. Women may wear slacks, skirts or dresses. Skirts and/or dresses may be no shorter than two inches above the knee. Open toed shoes or other shoes with openings on the tops of the shoes (e.g., Crocs or flip flops) cannot be worn.
• With the exception of a smooth band, rings should not be worn. Earrings should not interfere with personal protective equipment or patient treatment.

Personal Hygiene
• Residents/Fellows must come to clinic well-groomed and clean.
• Hairstyle must not interfere with patient or staff safety. Long hair (below shoulder length) should be contained or tied back so that it does not interfere.
• Mustaches, beards, and sideburns should be clean, neat, and well-trimmed, so facial hair can be contained within a surgical mask.
• Fingernails are to be clean and well-manicured.
• Perfumes or colognes are not permitted. (People can be highly allergic to these chemicals and an allergic response may be precipitated.)
• Jewelry cannot interfere with patient care. Finger rings and wrist watches need to be removed, because they may generate holes in gloves and interfere with protection from potentially infectious material (saliva, blood).
• Facial piercings or body tattoos must be removed or covered when treating patients. Earrings are acceptable.

Clinical Performance
Residents will receive a pass/fail grade in all aspects of clinical orthodontics. A pass is required to successfully complete the course. A clinical failure will result in a course grade of “F”. Any of the following behaviors constitute a clinical failure: Using mood altering substances (drugs or alcohol) within 12 hours of clinical care; violation of patient confidentiality policies; failure to abide by faculty instructions; misrepresenting themselves; performing any procedure or intervention without faculty approval; or falsification of clinical hours, records or documentation.

Moonlighting Policy
The program does not permit its residents/fellows to practice dentistry or otherwise be employed outside of the clinic during posted clinic, lectures and research hours. The Jacksonville University School of Orthodontics Clinic is not to be used for the practice of general dentistry outside of posted clinic hours. If a resident or fellow would like to perform a general dental procedure, they must receive written permission from the Program Director and schedule the patient with supervision from a Florida licensed dentist from the student body or faculty.

Final Exam
The final exam is held in the July of each year. The examiners panel is composed of a maximum of three internal Faculty members selected by the course director prior to the exam. Outside examiners may also be invited to participate in the exam. (Check the Clinical Orthodontics Course Syllabus for the latest exam protocol)

The 1st year exam consists of two portions:
• One case randomly selected from the resident’s assigned pool of active cases to be reviewed by the panel. The examinee is expected to express familiarity with the case diagnosis, treatment plan and progress. Quality of the resident’s skills of record keeping, proper documentation and delivery of consistent and timely care as reflected by the reviewed case is evaluated by the panel.

The 2nd year exam consists of three portions:
• Three case presentations prepared by the resident examinee according the standards of the American Board of Orthodontics clinical exam guidelines https://www.americanboardortho.com/orthodontic-professionals/about-board-certification/clinical-examination/clinical-examination-process/). The case must
have a minimum DI score of 10 and must be started and finished by the same resident. The panel may discuss any aspects of the case with the examinee to evaluate their knowledge of the Diagnosis, Problem List, Objectives, Treatment Planning, and Mechanotherapy.

**ABO Exam:**
- All residents are required to take the ABO written exam in the spring semester of the 2nd year of residency. Registration deadline for the exam is in December of the 2nd year of residency. JU will reimburse the exam’s registration fee.
- All residents are required to pass the ABO written exam. In case of failing to pass the ABO written exam, the resident will be required to pass a remedial exam administered by the JUSO prior to graduation.
- All residents must present at least one case to a panel of Faculty during their 2nd year final exam. The case must be prepared and presented according to the ABO format. The case must be treated by the examinee for the majority of the appointments.
- Residents are strongly encouraged to submit at least 6 cases that were started by the resident to a panel of JUSO’s ABO certified Faculty members in May of the 2nd year. The Faculty experts will keep a list of each resident’s ABO candidate cases and will advise the resident on which cases to submit to the ABO clinical exam before graduation.
- You may not see patients on weekends or when no faculty is present. You should not be in the clinic for any reason when it is not open for business or class. Do not ask a current resident or staff to lend their key or let you in the building after hours. This can result in a minimum of suspension for the resident who gives access.
- Do not ask a current resident to share their login credentials. Sharing of network credentials is a violation of JU policy and will result in suspension of the resident who shares their credentials. The alumni who logs in with credentials shared by someone else will be blocked and not granted any remote access. IT tracks remote access of the network and the report will be reviewed on a regular basis.

**Privacy Policy/Notice/Authorization**
The Jacksonville University School of Orthodontics is a hybrid covered entity under HIPAA. Any violation of this Privacy Policy shall be grounds for discipline, including dismissal from the program. Compliance with this Policy is required in addition to all other clinic policies, if any.

**PRIVACY NOTICE AND AUTHORIZATION Jacksonville University School of Orthodontics**

**THIS NOTICE DESCRIBES HOW MEDICAL INFORMATION ABOUT YOU MAY BE USED AND DISCLOSED AND HOW YOU CAN GET ACCESS TO THIS INFORMATION. PLEASE REVIEW IT CAREFULLY.**

Jacksonville University School of Orthodontics is an affiliated covered entity under HIPAA, the Health Insurance Portability and Accountability Act of 1996, with respect to the operation of the orthodontic clinic (the “Clinic”). These Privacy and Security Rules restrict the Clinic’s ability to use and disclose your protected health information (“PHI”). JU is a “hybrid entity” under HIPAA, meaning that some of its functions are covered under HIPAA and some are not. For example, the Clinic’s orthodontic services are covered functions under HIPAA because electronic bills are submitted for these services, but other services, like first aid provided to athletic students by JU employees, are not covered functions. These policies and procedures apply only to the Orthodontic Clinic. The remainder of JU is covered by another notice.

Your protected health information (PHI) such as your name, date of birth, dates of treatment, phone/fax numbers, email address, home address, social security number, other demographic data, as well as information pertaining to your diagnosis and treatment, may only be disclosed by administrative personnel, the teaching staff, dental assistants, and students, and can only be used or disclosed for:
- Contacting other health care providers (i.e., general dentist, oral surgeon, pediatrician, etc.) in connection with our rendering orthodontic treatment to you/your child;
- Contacting third party payers or spouses (i.e., insurance companies, employers with direct reimbursement, administrators of flexible spending accounts, etc.) in order to obtain
payment on your account (i.e., to determine benefits, dates of payment, etc.);
• To certifying, licensing and/or accrediting bodies (i.e., State Dental Boards, American Board of Orthodontics, etc.) in order to obtain certification, licensure or accreditation;
• To various courts, for use in legal actions of any type, upon your authorization or upon subpoena;
• Internally, to all staff members who have any role in your treatment or to laboratories who render supportive services (i.e.; labs that make retainers or models, etc.);
• To other patients and third parties who may inadvertently see or overhear incidental disclosures about your treatment, scheduling, etc.;
• To your family or close friends who may be involved in your treatment;
• To provide you with appointment reminders or information about treatment alternatives or other health-related benefits and services that may be of interest to you; and/or,
• Practice and/or marketing promotions for the School of Orthodontics; and
• For use as part of fulfilling our educational mission such as in scientific lectures, publications, presentations, continuing dental educational courses, or as part of approved research projects undertaken as part of the orthodontic curriculum.

Any other uses or disclosures of your protected health information will be made only after obtaining your written authorization, which will not expire and which you have the right to revoke at any time upon proper notification, however any revocation will not be retroactive.

Under these privacy rules, you have the right to:
• Request restrictions on the use and disclosure of your protected health information;
• Request confidential communication of your protected health information;
• Inspect and obtain copies of your protected health information from us;
• Amend or modify your protected health information in certain circumstances;
• Receive an accounting of certain disclosures made by us of your PHI; and,
• You may, without risk of retaliation, file a complaint with us concerning any violation of your privacy rights by submitting inquiries to our Privacy Contact Officer at our office address at 2800 University Blvd North Jacksonville, Florida 32211, or to the United States Secretary of Health and Human Services in Washington D.C. within 180 days of the violation.

We have the following duties under the new privacy rules:
• To maintain the privacy of your PHI and to provide you with this notice setting forth our legal duties and privacy practices with respect to such information;
• To abide by the terms of our Privacy Notice that is currently in effect;
• To advise you of our right to change this Privacy Notice and to make new notice provisions effective for all PHI maintained by us and if we do so, to give you with a copy of the revised Privacy Notice.

Please note that we are not obligated to:
• Honor any request by you to restrict the use or disclosure of your PHI;
• Amend your PHI if it is accurate and complete; or,
• Provide an atmosphere that is totally free of the possibility that your protected health information may be incidentally overheard by other patients and third parties.
• Protect against re-disclosure of your PHI by those legally entitled to receive it from us

This privacy notice is effective as of the date of your signature. If you have any questions about this Notice, please ask for our Privacy Contact Officer or contact him/her at our office address. Thank you.

PATIENT / PARENT ACKNOWLEDGMENT
I hereby acknowledge that I have received or reviewed a copy of this Privacy Notice; or, alternatively, I have refused to review it.
Resident Participation on Committees
The School of Orthodontics encourages resident participation on committees to work in an advisory role to the faculty. As the needs of the School change, the Program Director will establish ad hoc committees that will be phased out as the work of the ad hoc committee is accomplished. Each class selects representatives to the School of Orthodontics Standing Committees as follows:

- **Admission Committee:** Four representatives from the full-time faculty, two representatives from the second year and two representatives from the first year.
- **Disciplinary Committee:** Three full-time faculty from BRCHS and one representative from each class.
- **Faculty Recruitment:** Two representatives from the first and second year classes and one Fellow.
- **Extra-Curricular Academic:** Two representatives from the first and second year classes and one fellow.
- **Physical Plant:** Two representatives from the first and second year classes and one Fellow.
- **Social:** Two representatives from the first and second year classes and one Fellow.
- **Technology:** One or two faculty, Information Technology Coordinator, two representatives from the first year and two representatives from the second year classes.

A Resident/Fellow may attend meetings of any committee if permission is obtained from the Chair of the committee prior to the scheduled meeting. However, guests do not have the ability to vote on committee resolutions.

Disciplinary Committee
The Disciplinary Committee will serve as the official hearing body of the School of Orthodontics. They will hear issues that violate academic and clinical policy in the School of Orthodontics. Issues relating to violations of the JU Code of Conduct are discussed in the Jacksonville University Student Handbook: [https://www.ju.edu/greenpages/code-of-conduct.php](https://www.ju.edu/greenpages/code-of-conduct.php)

**Membership**
The composition of the Disciplinary Committee will be made up of two (2) residents and three (3) faculty members from the College of Healthcare Sciences.

**Student Selection**
Each class will select a resident to serve on the Disciplinary Committee. This person should be elected by a simple majority vote. If the class is unable to select a member to serve, the Program Director will select a resident from each class. Residents elected to the committee will serve a one-year term.

**Responsibilities of Members of the Disciplinary Committee**
Members are expected to attend all Committee meetings. A member shall be excused from attendance at any meeting or session of the Committee when the member is physically unable to be present, or when a matter is considered or action taken in which the member has a personal interest or a conflict of interest.

The proceedings of the committee shall be held in strict confidence by the members of the Student Body, the Faculty, and the Administration. A breech of such confidentiality shall be deemed a violation of the Honor Code. Any discussion about potential violations should be kept in confidence by the committee member(s) with knowledge of the alleged incident, even if no formal accusation has been lodged or where an accusation is pending. Knowledge of case specifics shall not be revealed to other committee members. Confidentiality with respect to written hearing records shall be maintained in accordance with University policy.

**Sanctions**
The Disciplinary Committee may recommend any of the following sanctions to the Program Director alone or in combination:

1. Expulsion
2. Suspension
3. Probation
4. Academic Sanctions
5. Limited Clinical Access
Letter of Reprimand
Assign additional clinical duty days

The Disciplinary Committee will promptly make its finding and recommendations available to the Resident/Fellow upon conclusion of the hearing.

Student Grievance Policy
The Brooks Rehabilitation College of HealthCare Sciences Student Grievance Policy covers any issues within the College (Appendix P).

Required Notice of Opportunity and Procedure to File Complaints with CODA
Each program accredited by the Commission on Dental Accreditation must develop and implement a procedure to inform residents/fellows of the mailing address and telephone number of the Commission on Dental Accreditation. The notice, distributed at regular intervals, but at least annually, must include but is not necessarily limited to the following language:

The Commission on Dental Accreditation will review complaints that relate to a program’s compliance with the accreditation standards. The Commission is interested in the sustained quality and continued improvement of dental and dental-related education programs but does not intervene on behalf of individuals or act as a court of appeal for individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students.

A copy of the appropriate accreditation standards and/or the Commission’s policy and procedure for submission of complaints may be obtained by contacting the Commission at 211 East Chicago Avenue, Chicago, IL 60611-2678 or by calling 1-800-621-8099 extension 4653 or at http://www.ada.org/en/coda/policies-and-guidelines/file-a-complaint

The accredited program must retain in its files information to document compliance with this policy so that it is available for review during the Commission’s on-site reviews of the program.

Required Record of Complaints
The program must maintain a record of student complaints related to the Commission’s accreditation standards and/or policy received since the Commission’s last comprehensive review of the program. (02/13)

Due Process Related to Investigation of Complaints
The following procedures have been developed to handle the investigation of complaints about an accredited program, or a program that has a current application for initial accreditation pending, which may not be in substantial compliance with Commission standards or established accreditation policies.

Policy on Complaints Directed at CODA-Accredited Educational Programs
Residents/fellows, faculty, constituent dental societies, state boards of dentistry, and other interested parties may submit an appropriate, signed complaint to the Commission on Dental Accreditation (CODA) regarding any CODA-accredited dental, allied dental or advanced dental education program, or a program which has an application for initial accreditation pending. The Commission is interested in the continued improvement and sustained quality of dental and dental-related education programs but does not intervene on behalf of individuals or act as a court of appeal for individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students.

Sexual Harassment
Jacksonville University is committed to providing a learning and working environment that emphasizes the dignity and worth of every member of its community, free from discriminatory conduct. Sexual harassment in any form or context is inimical to this and will not be tolerated. Sexual harassment subverts the mission and the work of the University, and can threaten the career, educational experience, and well-being of student, faculty and staff. Sexual harassment also constitutes a form of illegal sex discrimination. The School of Orthodontics will enforce the University policy on Sexual harassment. The entire Title IX policy can be found at https://www.ju.edu/titleix/.

FIRST YEAR CURRICULUM:
FALL SEMESTER
ORTH 503. Clinical Orthodontics I (4; F1)
380 hours per semester. Clinical training in patient management procedures, treatment and techniques. Patients are treated in the clinical setting under strict supervision to prepare the student for private practice.

ORTH 511. Evidence-Based Diagnostic Seminar I (2; F1)
75 hours per semester. Diagnostic and treatment planning seminar and journal club. Students develop formal presentations on cases being treated in the clinic and present their cases at conferences for faculty input.

ORTH 515. Introduction to Research (3; F1)
90 hours per semester. The focus of this course is on basic principles of biomedical and clinical research. It includes the overview of major research components, such as the scientific method, research ethics, biostatistics, formulating a research question, study design, sampling, measurement and interpretation of data, and reliability and validity of results. This course will also include an introduction to writing skills.

ORTH 516. Orthodontic Literature Review I (1; F1)
30 hours per semester. The residents will conduct a critical literature review, to develop or improve their ability to think critically and identify gaps in knowledge worthy of further study. Literature will be selected from major peer-reviewed journals and students will be asked to assess the quality of this evidence.

ORTH 530. Philosophy and Biomechanics of Orthodontic Mechanotherapy I (3; F1)
90 hours per semester. Introduction to orthodontic terminology and theory. Typodont treatment is coordinated with wire bending exercises and applied biomechanics. Orthodontic biomaterials and instrumentation are also introduced.

ORTH 531. Evaluation of the Orthodontic Patient (2; F1)
70 hours per semester. Records acquisition and the application of clinical data are integrated to facilitate developing discriminating diagnostic treatment planning skills. Governmental and University rules and regulations are emphasized and are integrated with essential risk management techniques in order to develop strong diagnostic and treatment planning skills.

ORTH 532. Biomedical Core I (Developmental Growth and Anatomy) (1; F1)
30 hours per semester. Dentofacial growth and development are discussed in detail from embryology to skeletal maturation. Complementing this area of study is a concentrated course in head and neck anatomy.

ORTH 540. Introduction to Clinical Orthodontics I (3; F1)
250 hours per semester. Training in patient management procedures, treatment and techniques. Patients are treated in the clinical setting under strict supervision to prepare the student for private practice. The purpose of this course is to give the students through the one year of Fellowship an
introduction of the understanding of the clinical principles of orthodontics treatment and management of the orthodontic patient. The course is designed to integrate the knowledge of evidence based diagnosis and treatment planning with clinical management of simple assigned cases (minimum 25 cases/per student) as well as proper patient’s charts keeping, records keeping and efficient scheduling. The course will prepare the student to be competent in delivering clinical care to the orthodontic patient with simple problems list. The majority of the cases with need for limited or simple orthodontic correction are expected to be assigned and completed by the Fellows.

ORTH 550. Basic Evidence based Diagnosis and Treatment Planning I (2; F1)
64 hours per semester. Students develop formal presentations on cases being treated in the clinic and present their cases at conferences for Faculty input. This course is an introduction to concepts of evidence based orthodontic diagnosis and treatment planning. The Fellows will start to be familiarized with contemporary literature (evidence) in incorporate in treatment planning exercises.

ORTH 560. Introduction to Orthodontics Literature and Research I (1; F1)
32 hours per semester. Series of classes with emphasis on improving the ability of critical review of scientific literature, understanding the basic concepts of biostatistics, and conceiving a testable research question for the future research project.

SPRING SEMESTER
ORTH 512. Clinical Orthodontics II (4; S1)
380 hours per semester. Continuation of patient management procedures, treatment and techniques. Students continue to develop and hone their clinical skills under faculty supervision.

ORTH 520. Evidence-Based Diagnostic Seminar II (2; S1)
120 hours per semester. Students continue to develop their differential diagnostic and treatment planning skills as well as participation in journal club.

ORTH 525. Principles of Research I (2; S1)
60 hours per semester. The focus of this course is on the development of the student’s thesis proposal. A comprehensive synthesis of the relevant literature is conducted by the student and a research proposal is developed. The student will be assigned a committee of advisors with one principal Mentor. The 525 Student’s project advisors will evaluate the proposal to identify validity and viability of the topic chosen. The student will submit the thesis proposal to the IRB.

ORTH 526. Orthodontic Literature Review II (1; S1)
30 hours per semester. Students will be exposed to contemporary Orthodontic literature through class assignments and review of selected textbook chapters and scientific literature. Students will critically analyze readings in classroom discussions.

ORTH 533. Philosophy of Biomechanics and Orthodontic Mechanotherapy II (3; S1)
90 hours per semester. Introduction to various orthodontic theories and the evolution of treatment mechanics, appliance design, and bracket prescription. Orthodontic and orthopedic force systems are studied through applied biomechanical and clinical principles.

ORTH 536. Biomedical Core II (1; S1)
20 hours per semester. In this seminar series, the basic sciences are discussed as they relate to clinical practice. Topics include histology and oral pathology.
ORTH 538. Interdisciplinary Orthodontics I (1; S1)
30 hours per semester. Seminar series in diagnosing and managing patients with severe dentofacial deformities with a combination of orthodontics and orthognathic surgical intervention

ORTH 542. Introduction to Clinical Orthodontics II (3; S1)
250 hours per semester. Continuation of clinical training in patient management procedures, treatment and techniques started in the Introduction to Clinical Orthodontics I course. The majority of the assigned cases should be in mid-treatment at this point and clinical competency as well as efficiency is expected to increase.

SUMMER FIRST YEAR
ORTH 522. Clinical Orthodontics III (4; SU1)
381 hours per semester. Continuation of patient management procedures, treatment and techniques

ORTH 523. Evidence-Based Diagnostic Seminar III (2; SU1)
75 hours per semester. Diagnostic and treatment planning seminar as well as journal club, Students start to present mid treatment progress of their cases in progress as detailed critique of both the diagnosis and clinical results are evaluated.

ORTH 545. Principles of Research II (1; SU1)
30 hours per semester. The focus of this course is on implementation of the student’s thesis research project after obtaining IRB approval. Data collection and analysis will begin. Students will give oral presentations on the progress of the research project.

ORTH 546. Orthodontic Literature Review III (1; SU1)
30 hours per semester. Continuation of the review of current literature. Students will be exposed to contemporary Orthodontic literature and they will be assigned recommended readings to be discussed and critically analyzed in the classroom.

SECOND YEAR CURRICULUM:
FALL SEMESTER
ORTH 623. Special Topics in Orthodontic Practice Management I (1; F2)
30 hours per semester. This course will cover the aspects of the business administration of an orthodontic practice. Topics to be covered will include but are not limited to accounting for the professional practice, internal and external marketing techniques, human resources considerations, information technology, organizational behavior, investments and financial strategies, and other selected topics.

ORTH 626. Clinical Orthodontics IV (4; F2)
382 hours per semester. Continuation of the clinical component of the program. Careful attention is paid to the nuances that distinguish one clinical situation from another.

ORTH 633. Evidence-Based Diagnostic Seminar IV (2; F2)
120 hours per semester. This seminar series demands that the students discriminate in their diagnostic thinking and case commentary.
ORTH 638. Interdisciplinary Orthodontics II (1; F2)
30 hours per semester. Seminar series devoted to interdisciplinary care between advanced restorative dentistry, periodontics, and orthodontics.

ORTH 640. Principles of Research III (1; F2)
30 hours per semester. Continuation of the student’s thesis research project. Students will give oral presentations to update peers and advisors on the research project progress and preliminary findings.

ORTH 641. Orthodontic Literature Review IV – ABO prep (1; F2)
30 hours per semester. Literature will be read and analyzed as recommended by the American Board of Orthodontics (ABO) in preparation for the ABO written exam. The students will be given assignments from classic articles and textbooks along with occasional quizzes to assess their progress in preparation for the written ABO exam. Classroom sessions will be conducted to follow the sequence of topics published by the ABO’s updated reading list.

SPRING SEMESTER
ORTH 624. Special Topics in Orthodontic Practice Management II (1; S2)
30 hours per semester. The second semester of orthodontic practice management. Topics to be covered will include but are not limited to accounting for the professional practice, developing internal and external marketing plans, human resources considerations, information technology, organizational behavior, investments and financial strategies, and other selected topics.

ORTH 632. Biomedical Core III (1; S2)
20 hours per semester. In this seminar series, the basic sciences related to orthodontic practice are discussed. Topics include pharmacology and physiology.

ORTH 636. Clinical Orthodontics V (4; S2)
382 hours per semester. Continuation of patient management procedures, treatment and techniques. By this point the student is finishing a number of cases and the retentive phase of clinical practice is being emphasized. A critical review of the patient’s results is undertaken.

ORTH 637. Evidence-Based Diagnostic Seminar V (2; S2)
120 hours per semester. Diagnostic and treatment planning seminar. Greater emphasis is being placed on evaluating the finished cases with respect to the original diagnosis and treatment plan undertaken.

ORTH 639. Interdisciplinary Orthodontics III (1; S2)
30 hours per semester. Seminar series devoted to interdisciplinary care of craniofacial anomalies. Topics include speech pathology, audiology, plastic surgery, ENT and dentistry.

ORTH 730. Principles of Research IV (1; S2)
30 hours per semester. Continuation of the student’s thesis research project. Students will provide advisors with survey of findings and project status. The project should be near conclusion and ready for write-up by the end of this semester. Students will organize the information and present a final outline to their advisors for approval.

ORTH 731. Orthodontic Literature Review V – ABO preparation (1; S2)
30 hours per semester. The course will complete the review of the Literature recommended by the American Board of Orthodontics (ABO) in preparation for the ABO written exam. The students will also
be given reading assignments from contemporary journal articles.

**SUMMER SECOND SEMESTER**

**ORTH 625. Special Topics in Orthodontic Practice Management III (1; SU2)**
30 hours per semester. The second semester of orthodontic practice management, Topics to be covered will include but are not limited to accounting for the professional practice, developing internal and external marketing plans, human resources considerations, information technology, organizational behavior, investments and financial strategies, and other selected topics.

**ORTH 643. Clinical Orthodontics VI (4; SU2)**
380 hours per semester. Continuation of patient management procedures, treatment and techniques, graduating students will transfer their patients to those residents completing their first year of education in order to facilitate continuity of care.

**ORTH 644. Evidence-Based Diagnostic Seminar VI (2; SU2)**
75 hours per semester. Greater emphasis is being placed on evaluating the finished case with respect to the original diagnosis and the treatment plan undertaken.

**ORTH 740. Principles of Research V (3; SU2)**
90 hours per semester. The focus of this course is on the conclusion and final presentation of the thesis research project. Analysis of data, interpretation and conclusion of the project will be prepared for dissemination. Thesis write-up is finalized and submitted to the student’s advisory committee in preparation for oral defense.

**FALL THIRD SEMESTER**

**ORTH 726. Clinical Orthodontics IV (4; F3)**
375 hours per semester. Continuation of patient management procedures, treatment and techniques.

**ORTH 733. Evidence-Based Diagnostic Seminar VII (2; F3)**
75 hours per semester. Greater emphasis is being placed on evaluating the finished case with respect to the original diagnosis and the treatment plan undertaken.

**ORTH 746. Thesis Seminar (3; F3)**
60 hours per semester. The student will prepare and then present an oral defense of the final thesis project to the advisory committee and orthodontics department. The student will present areas of future research stemming from the thesis results. The student will serve as a mentor to underclassmen in the area of research methodology and in the application of research evidence to clinical practice. A manuscript of the thesis results is submitted for publication in an appropriate peer-reviewed journal.

APPENDIX P

Jacksonville University
Brooks Rehabilitation College of HealthCare Sciences
Student Grievance Policy

The purpose of this policy is to provide a pathway for impartial review of student issues or concerns that have not been resolved through normal informal channels. For the purpose of this policy, a grievance is defined as a complaint involving unfair, arbitrary or unwarranted treatment that has not been resolved through normal channels. The following list of issues or concerns have specific University Policies that supersede this grievance process:

- Student Grade
  - [http://www.ju.edu/academics/Pages/Academic-Catalog.aspx](http://www.ju.edu/academics/Pages/Academic-Catalog.aspx)
- Violations of the code of Conduct
  - [http://www.ju.edu/greenpages/Pages/Code-of-Conduct.aspx](http://www.ju.edu/greenpages/Pages/Code-of-Conduct.aspx)
- Sexual Harassment
  - [http://www.ju.edu/humanresources/Pages/Sexual-Harrassment.aspx](http://www.ju.edu/humanresources/Pages/Sexual-Harrassment.aspx)

A. Discuss the matter directly with the faculty or staff member involved.
B. If there is not a satisfactory resolution, appeal to the appropriate department Director.
C. If there is not a satisfactory resolution, appeal to the Program Director of the School.
D. If there is not a satisfactory resolution, appeal to the Dean of the CHS.
E. If there is not a satisfactory resolution an appeals committee will convene.
F. The committee will report the final decision to the Provost.

1. Grievance must be filed within 30 days of the incident.
2. The unresolved grievance must be submitted to the CHS Dean in writing.
3. At any point in the process the parties involved may achieve a resolution of the process and stop the grievance process. The written grievance must contain specific details. When appropriate, dates, times, witnesses and facts related to the complaint must be included.
4. The written grievance must clearly state and document the evidence of unfair, arbitrary or unwarranted treatment.
5. The CHS grievance committee consist of a faculty member from each School in the CHS. In addition to this standing committee a Student Life administrator and three students appointed by the Dean of the CHS will serve on the committee. If a faculty member on the grievance committee is involved in the current grievance the CHS dean will appoint a replacement.
6. All relevant documents must be provided to the committee. The Student Life administrator will serve as chair. A CHS faculty member will serve as recorder and keep minutes of the proceeding.
7. The time and date of the hearing shall be provided to each individual in writing at least 10 days prior to the meeting.
8. Members of the committee must hold all proceeding information as confidential.
9. Members of the committee will have 3 business days to review all documentation.
10. A private hearing will be conducted
11. All involved parties will be allowed to attend all parts of the hearing
12. Both parties may have an advisor that is a member of the JU community attend at their own expense. The advisor must not be an attorney.
13. Witnesses may be called for information or questions by the committee. Witnesses are only permitted to attend the part of the hearing in which they will be questioned.
14. All documentation and minutes of the procedures will be retained by the CHS Dean.
15. The hearing will be recorded, this recording is the property of the University.
16. Committee deliberations will not be recorded.
17. All members of the committee are permitted to ask questions of both parties. The chair of the committee will determine procedural questions.
18. A majority consensus of the committee towards a resolution will be provided to the Complaining party, other involved parties and the Dean. The decision of the committee is final.

Should a student wish to appeal the decision made by the Committee the process is as follows:
   1. Discuss the matter directly with the Provost.
   2. The Provost will review the case and determine any additional action that should occur based on this review and the recommendation of the appeals committee.
APPENDIX Q

Standard Procedure for Appeals of Grades and Sanctions
From JU Student Handbook

It is understood that students may have questions about their grades. Most can easily be answered through conference with the instructor. In the event that a student feels he/she has been treated unfairly, or that an instructor has deviated from his/her prescribed formula for grading in an arbitrary or unwarrantedly punitive manner, the student may appeal the grade.

The following timetable and grade appeal process shall be used whenever the student disagrees with a grade assigned, for academic misconduct or any other reason.

1) Appeals cannot normally be made unless a student has first discussed his/her concerns with the instructor. This conference should take place within three business days of the student being notified of the grade assigned, unless unforeseen and extenuating circumstances beyond the student’s control warrant an extension. The student must be able to document such extenuating circumstances if requested by the instructor. If the grade assigned was for an assignment due the last week of the semester or on a final examination, the student and instructor must meet to confer no later than three business days after the beginning of the following semester.

2) If the concerns remain unresolved after the conference with the instructor, the student must inform the instructor in writing within two business days of the conference that he/she is dissatisfied with the results of the conference. The student may then appeal the instructor’s decision to the appropriate Division Chair, or College Dean if the department or academic in which the course is taught is not part of a division. In the case that the grade in question was assigned by an adjunct member of the faculty, the appeal must also be made directly to the appropriate Division Chair or College Dean. An appeal must be formally submitted in writing, clearly stating and documenting the evidence for unfair, arbitrary or unwarranted treatment and must be submitted within ten business days of the student’s written notification to the instructor that the issue remains unresolved. The Division Chair/College Dean shall confer with both the student and the concerned faculty member (or adjunct, if available) together within five business days of receiving the written appeal. The concerned faculty member (or adjunct, if he/she so desires) may at this time submit a formal written response to the student’s appeal.

3) If the student’s concern is still unresolved after the conference with the Chair/Dean and faculty member, or if the instructor (or adjunct, if available) disagrees with the decision of the Chair/Dean, the Chair/Dean shall within five business days form a committee of five faculty members, four from within the Division/College to review the work in question and one from the Committee on Academic Standards, who comes from outside the Division/College, to insure that both the student and faculty member are fairly treated. Within ten business days the committee must review the case and issue its final recommendation. The committee may either recommend the grade remain unchanged from the instructor’s decision or recommend the grade be changed to a value the committee deems appropriate for the case. If the case involves academic misconduct, the committee at that time may also recommend probation or suspension of the student, or dismissal from the University based upon compelling evidence of serious academic misconduct. In cases where the committee rules that the student should receive a penalty resulting in a grade of “F” for a course, the student may not withdraw or be withdrawn from the course at any time.
4) The committee’s recommendation then must be issued to the Provost, the Division Chair/College Dean, the instructor and the student in writing along with an explanation of the rationale for the recommendation. It is the responsibility of the Provost to see that the recommendation is carried out. If a semester/term ends without the process reaching a final resolution, the process should continue at the beginning of the next semester at the point that was reached at the conclusion of the previous semester. In this case, the grade assigned for the course will be recorded as “NG” (no grade) on the student’s official transcript, without prejudice, until the case is resolved.

5) If the Division or College does not follow the procedures outlined above then the student or instructor may appeal directly to the Provost. This appeal must be submitted in writing and must clearly demonstrate how the procedures contained in this Grade Appeal Process were violated. The Provost is to determine whether proper procedures have been followed. In the event they have not been followed, any recommendation or decision may be declared null and void and sent back to the Division or College for reexamination. The final disposition of the case must be reported to both the instructor and the student prior to the issuance of the grade.
